DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of group I in the reply filed on 7/13/05 is acknowledged. The traversal is on the ground(s) that both of the inventions relate to values and estimates. This is not found persuasive because values in group I relates to mental process while the values in group II relates to artificial process.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

2. Claims 1-11 are objected to because of the following informalities:

Claims 1, 3, 5-7, 9 and 11, line 1, after "PAD" insert - - (Pleasure-Arousal-Dominance) - -.

Claim 11, line 1, after "AVC" insert - - (Arousal Valence Control) - -.

Claim 5, line 6, after "percentage;" insert - - and - -.

Claim 7, line 4, after "Davg;" insert - - and - -.

Claim 11, line 10, after "Davg;" insert - - and - -.

Appropriate correction is required.

Drawings

3. The drawings are objected to because figures 7-9, arrowheads should be shown at an input or an output of a device. Corrected drawing sheets in compliance with 37

CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention is directed to mathematical algorithm such as statistical algorithm. The steps of the claimed invention of claims 1-11 can be done mentally. The claimed invention is basically manipulation of

Art Unit: 2129

PAD table values by calculating the average of these values or calculating the distance between these values then refers to a result of the calculated values as a mental states.

The claimed invention recites mathematical algorithm that fails to establish tangible and concrete results. Therefore, the claimed invention is directed to non-statutory subject matter.
